

How it works:

EagleSun™ Pool Panels efficiently absorb the sun's heat and transfers the energy to the swimming pool water that is pumped through them.

The system is automatic and can incorporate the existing pump. Your EagleSun™ system is designed to be maintenance free.

Solar Pool Heating

Let the sun
Heat your pool
All year round.

Swim Longer

Installing a solar pool heating system will increase, sometimes even double, the amount of time your swimming pool can be comfortably used during the year.

Economical

When compared to heating your pool with other methods, solar heating can pay for itself in under 3 years.

Environmentally Safe

Solar Pool heaters use solar energy to provide a clean energy alternative to conventional heating sources that pollute the environment.

Hurricane Tested

EagleSun™ panels can withstand hurricane force winds of 159.6 mph!

Quality

With up to 35% more polypropylene and UV stabilizers than any other manufacturer, EagleSun™ Pool Panels keep your pool heated longer and have a longer life expectancy.

Maintenance Free

Once the panels are installed, you can relax in your warm pool without any additional maintenance or cost involved.

Guarantee

EagleSun™ Products are backed by a comprehensive 10 Year Limited Lifetime Warranty to ensure years of enjoyment.
